## PROFESSIONAL SUMMARY

I am a third year Computer Science student at Jomo Kenyatta University of Agriculture and Technology with a strong interest in software development, mobile development, and game development. I have hands-on experience building interactive game applications using Unity, developing mobile applications, developing software, and working with databases using SQL. I enjoy solving real-world problems through technology and am particularly motivated by creating tools that help others make informed decisions.

---

## EDUCATION

### Jomo Kenyatta University of Agriculture and Technology

Bachelor of Science in Computer Science (2023 – Present)

- *Relevant Coursework:* Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Database Systems (SQL), Artificial Intelligence & Simulation, Mobile Application Development

### Kagumo Boys High School

Kenya Certificate of Secondary Education (2019 - 2022)

- Grade A-(80 points)
- 

## EXPERIENCE

### Game Development Intern – JHUB Africa

*Pathfinder Project* (May 2025 – Aug 2025)

- Contributed to the development of a career guidance game aimed at helping high school students make informed career decisions.
- Developed gameplay features and mechanics using Unity and C#.
- Collaborated with a team to design engaging and educational user experiences.
- Assisted in debugging, testing, and improving overall game performance.

- Participated in iterative development cycles and incorporated user feedback.
- 

## PROJECTS

### Pathfinder – 3D Career Guidance Game (Unity)

- Developed an interactive 3D game to guide students in exploring different career paths.
- Implemented gameplay systems and user interactions using Unity and C#.
- Focused on creating immersive simulations to support decision-making.

### SemSync – Web & Mobile Application

- Built a cross-platform academic scheduling system available as both a web app and Android application.
- Enabled users to manage schedules, track tasks, and receive reminders.
- Designed for usability in low-connectivity environments with efficient data handling.

### Wellness Tracker App (PLP Project)

- Developed a wellness tracking application to monitor user habits and health-related activities.
  - Implemented features for tracking daily routines and visualizing progress.
  - Focused on improving user engagement through simple and intuitive design.
- 

## TECHNICAL SKILLS

**Languages:** Java, C#, Python, SQL, Kotlin, JavaScript, C++

**Game Development:** Unity (C#), Blender

**Full-Stack Development:** React.js, Next.js, Mongo-DB, Express.js, Node.js, Docker, Tailwind CSS

**Web & Tools:** Git/GitHub, VS Code, MySQL, Visual Studio

---

## CERTIFICATIONS

- PLP Full Stack Development Certificate
  - NVIDIA Deep Learning Institute Certificate (*Building LLMS*)
  - IBM AI Fundamentals
  - IBM Data Fundamental
  - Blender Beginner Certificate
  - Power-Bi Beginner Certificate
  - ALX Data Science (Ongoing)
  - IBM Cybersecurity (Ongoing)
- 

#### **ADDITIONAL INFORMATION**

- Strong problem-solving and analytical skills
  - Passionate about building impactful technology solutions
  - Interested in game development, mobile development, and AI systems
-
